

NATURE INSIDE

INFORMATION MAGAZINE OF CHEREMOSKYI NNP

**CHERMOSKIY NATIONAL NATURE PARK INVITES YOU TO THE
PERKALABA CAMP ENVIRONMENTAL EDUCATION CENTRE!**

Throughout the summer season, we welcome organized groups of up to 30 participants for a meaningful and memorable stay surrounded by the breathtaking nature of the Carpathian Mountains.

Programme includes:

- 6 nights / 7 days
- Four meals a day
- A rich environmental education and nature interpretation programme
- Comfortable accommodation in a pristine natural setting
- Modern indoor bathrooms and shower facilities

Price: UAH 1,450 per person per day

Priority is given to middle school-aged children.

We also welcome enquiries for:

- Adult camps
- Corporate retreats
- Thematic events
- Programmes for institutions and organizations

To book your stay or receive additional information, please send us a private message or contact the Park Administration at +380961128693. We look forward to welcoming you to the heart of the Carpathians—where nature inspires, educates, and brings people together!

ANNOUNCEMENT OF THE WINNERS OF THE SPRING FLOWERS NEED PROTECTION! POSTER COMPETITION

The main goal of the competition was to remind us all that primroses are not merely the first flowers of the season—they are an invaluable part of our natural heritage that deserves our protection and responsible care. This year, we received 26 creative entries from young participants. Each poster is a heartfelt expression of children's love for nature and their commitment to its conservation. As no entries were submitted in the third age category, the competition committee decided to select three winners from the remaining two age categories.

Competition Winners:

Category I – Ages 6–9 (Grades 1–4):

Tetiana Kravchenko – Seliatyn Supporting General Secondary School I–III, named after Oleksandr Zaiets

Category II – Ages 10–14 (Grades 5–8):

Sofiia Korostylova – Putyla Academic Lyceum named after Yurii Fedkovych

Ivanna Shkiruk – Pidzakharychi Gymnasium

We sincerely congratulate the winners! They will soon receive their prizes.

In addition, by decision of the Park Administration, all competition participants will receive a special gift in recognition of their efforts—a fragrant Carpathian herbal tea. We extend our heartfelt thanks to all participants for their talent, creativity, and care for nature. We are also deeply grateful to the teachers and mentors for their encouragement, inspiration, and dedication to fostering a love of nature among the younger generation.

Together, let us protect our primroses so that every spring continues to delight us with their unique beauty!

REWARDS FOR YOUNG NATURE GUARDIANS!

We are delighted to announce that all participants of the competition have now received their gifts! We sincerely thank every child for their wonderful creative works, dedication, and love for nature. You are true champions who remind us, through your example, how important it is to protect our precious primroses. We also express our heartfelt gratitude to the teachers and mentors for their support, encouragement, and commitment to fostering environmental awareness among children. Together, we are raising a generation that loves, values, and protects nature!

CHEREMOSKIY NATIONAL NATURE PARK

21 MAY – VYSHYVANKA DAY

May every Ukrainian family be blessed with peace, goodness, unity, and God's protection.

The team of Cheremoskiy National Nature Park warmly congratulates everyone on this celebration of Ukrainian unity, strength, and cultural heritage. May the vyshyvanka always remain a symbol of our resilience, our love for our homeland, and our pride in the Ukrainian people.

On this special day, we express our deepest gratitude to our brave servicemen and servicewomen, whose courage and dedication allow us to preserve our traditions, work, live, and celebrate under peaceful skies. We bow our heads in respect to everyone defending Ukraine.

CARING FOR NATURE IN ACTION

A spring clean-up campaign has taken place at Cheremoskiy National Nature Park. Park staff, local residents, and volunteers joined forces to clean, landscape, and improve the Park's surroundings, creating an even more welcoming environment for visitors. We sincerely thank everyone who contributed their time and effort to preserving the beauty of our Carpathian landscape.

CHERMOSKIY NATIONAL NATURE PARK REPRESENTATIVES PARTICIPATE IN AN INTERNATIONAL EU LIFE PROJECT PROPOSAL WRITING SEMINAR

Representatives of Cheremoskiy NNP — Acting Director Vasyl Slyzhuk and Senior Research Fellow Diana Yuzyk—joined the Ukrainian delegation on a study visit to Rominta Forest Landscape Park in Poland. During the visit, they participated in an international seminar dedicated to preparing conservation project proposals for the EU LIFE Programme. Participants gained practical knowledge of proposal writing, budget planning, partnership development, and project design based on European best practices. The knowledge and skills acquired during the seminar will strengthen the Park's capacity to secure international funding for biodiversity conservation. We extend our sincere gratitude to the Director of Rominta Forest Landscape Park, Jaromir Krajewski, and our Polish colleagues for organizing this valuable training and for their support of Ukraine.

BIRD MONITORING CONTINUES AT CHEREMOSKIY NNP

The Park's Senior Research Fellow, together with students interns from Yuriy Fedkovych Chernivtsi National University, carried out a repeat survey of breeding birds in the Perkalaba area. The fieldwork was conducted within the framework of the Pan-European Common Bird Monitoring Scheme (PECBMS). Following the standardized survey methodology, the researchers recorded more than 40 bird observations. At the same time, acoustic monitoring was carried out at 10 permanent sampling points. In cooperation with the staff of the Perkalab Conservation and Scientific Research Unit, autonomous acoustic recorders were installed along the Chorny Dil Ridge to support long-term wildlife monitoring. During the field surveys, the team also documented several remarkable insect and amphibian species, as well as the mass flowering of the protected Military Orchid (*Dactylorhiza majalis*) and other characteristic Carpathian plant species. The data collected will contribute to the conservation of biodiversity in the Ukrainian Carpathians.

AN INSPIRING MEETING THAT ENCOURAGES CARE FOR NATURE

Staff of Cheremoskiy NNP held an educational meeting with students of Pidzakharychi Gymnasium at the invitation of the school's principal. Park specialists introduced the children to the region's rich natural heritage and highlighted the importance of protecting the environment through responsible actions. A special part of the event was the joint planting of young trees on the school grounds, bringing students together in a meaningful environmental initiative. We sincerely thank the staff and students of the gymnasium for their warm hospitality and look forward to future meetings!

EDUCATIONAL VISIT TO YURIY FEDKOVYCH LYCEUM

At the invitation of the school administration, staff of Cheremoskiy NNP delivered an educational lesson for students of Putyla Academic Lyceum named after Yuriy Fedkovych. The students learned about the Park's daily work, the remarkable natural heritage of the region, and the key challenges facing nature conservation. Particular attention was given to environmental responsibility. To conclude the event, the students and Park specialists planted arborvitae (thuja) trees on the school grounds as a symbol of caring for nature and future generations. We sincerely thank for warm welcome!

A STORY OF RESCUING A EUROPEAN ROE DEER (CAPREOLUS CAPREOLUS)

Mykhailo Havryliak, a resident of the village of Roztoky, rescued an injured European roe deer (*Capreolus capreolus*) after it had been attacked by dogs. Thanks to his compassion and the professional assistance of veterinarian Ivan Zakhariuk, the animal's condition was stabilized. After receiving treatment, the European roe deer was transferred to Cheremoskiy NNP in the village of Perkalaba. Because of its severe injuries and its habituation to people during rehabilitation, the animal would not be able to survive if released back into the wild. It will therefore remain under the permanent care of the Park's staff in a safe environment. This story is a powerful reminder that compassion and timely action can save wildlife. If you find an injured wild animal, please contact a veterinarian or your local nature conservation authorities as soon as possible. We sincerely thank everyone whose care and dedication helped save this animal's life!

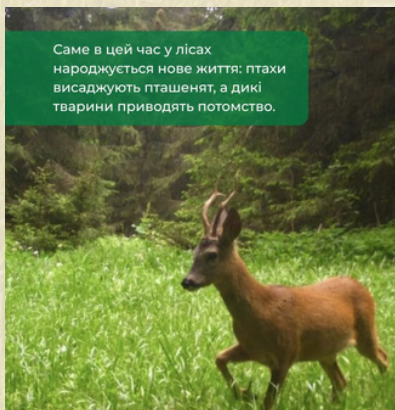

SILENCE IN THE CHEREMOSKYI NNP

З 1 квітня по 15 червня на території НПП «Черемоський» діє режим тиші - особливий період, коли природа потребує спокою найбільше.

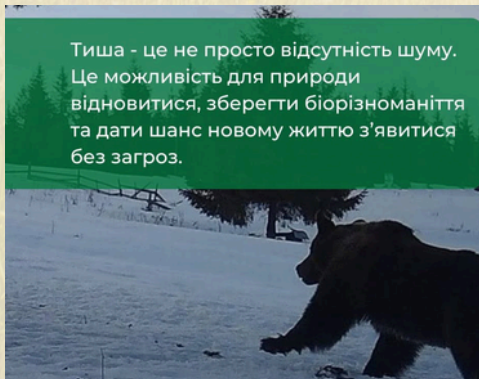

Саме в цей час у лісах народжується нове життя: птахи висаджують пташенят, а дикі тварини приводять потомство.

Будь-який зайвий шум або втручання людини може налякати їх і навіть поставити під загрозу виживання малюків.

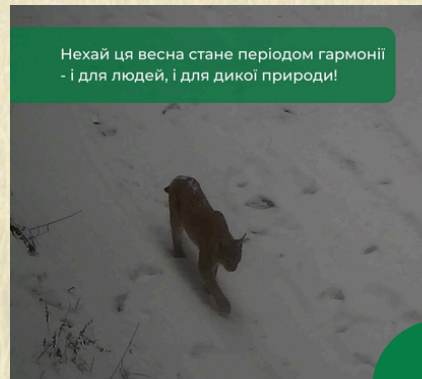

Тиша - це не просто відсутність шуму. Це можливість для природи відновитися, зберегти біорізноманіття та дати шанс новому життю з'явитися без загроз.

Закликаємо всіх відвідувачів бути свідомими: обирайте спокійний відпочинок, поважайте природу та її мешканців!

Нехай ця весна стане періодом гармонії - і для людей, і для дикої природи!

CHERMOSKIY NATIONAL NATURE PARK JOINS THE PECBMS

From 29 April to 7 May, Diana Yuzyk, PhD in Biology and Senior Research Fellow at Chermoskiy NNP, carried out the first round of breeding bird surveys under the Pan-European Common Bird Monitoring Scheme (PECBMS).

The surveys were conducted along two monitoring routes, each exceeding 3 km in length, within the territory of the Putyla Community and the National Nature Park, following the PECBMS_Ukraine 2026 methodology. Birds were recorded both visually and by their vocalizations to support long-term monitoring of changes in bird populations and species composition. The collected data will be submitted through the official reporting system and provided to the national coordinators for analysis at both the national and Pan-European levels.

ACOUSTIC BIRD MONITORING AT CHERMOSKIY NNP: FOUR CONSECUTIVE YEARS OF SYSTEMATIC RESEARCH

On 29 April, Diana Yuzyk, PhD in Biology and Senior Research Fellow at Chermoskiy NNP, carried out the first survey of the 2026 field season as part of the Park's long-term acoustic monitoring programme for common bird species along two monitoring routes. This research has now been conducted for the fourth consecutive year using autonomous acoustic recorders provided by the Frankfurt Zoological Society in Ukraine. This modern, non-invasive monitoring method enables researchers to detect elusive and nocturnal bird species, analyse seasonal patterns in bird activity, and assess changes in ecosystem condition over time. The results of this long-term monitoring programme have already been published in Ukrainian peer-reviewed scientific journals as well as in an international Scopus-indexed journal, contributing to the broader understanding of bird diversity and conservation in the Ukrainian Carpathians.

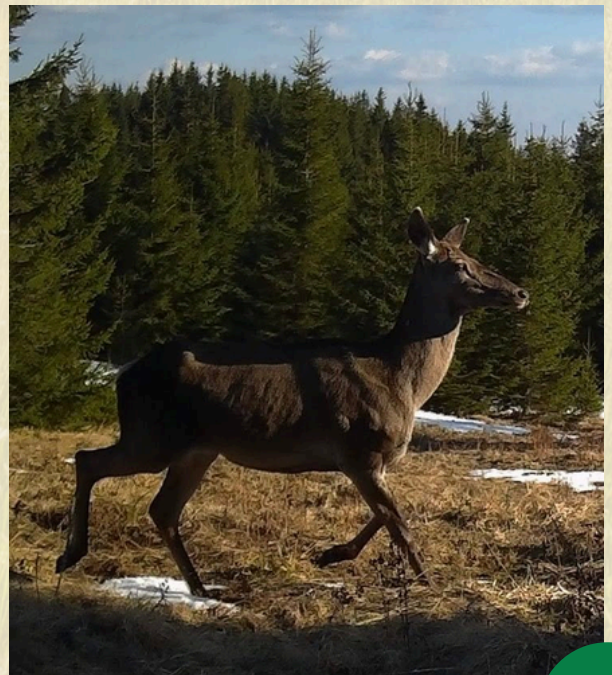

HERALDS OF SPRING AT CHEREMOSKIY NNP

The snow has not yet completely melted, and the chilly wind still reminds us that winter has not fully departed. Yet nature is already awakening, offering the first signs of spring. Among the quiet forest floor emerges the common snowdrop (*Galanthus nivalis*) – delicate yet remarkably resilient, a true herald of the new season. In the Park's forests and woodland clearings, snowdrops form beautiful white carpets that captivate visitors with their simple elegance. For generations, people have admired these early spring flowers. Unfortunately, many forget that this fragile species needs our protection. The common snowdrop (*Galanthus nivalis*) is listed in the Red Book of Ukraine, and every flower picked is a loss to nature. Today, the snowdrop reminds us not only that spring has arrived, but also that we all share the responsibility of protecting the natural world. To admire nature is to protect it. May these tiny white flowers continue to announce the arrival of spring for many years to come.

IN HARMONY WITH WILDLIFE

Camera traps installed in Cheremoskiy NNP have captured fascinating footage of wild animals moving across open mountain landscapes. As the first spring vegetation begins to emerge, wildlife becomes increasingly active along forest edges and mountain meadows. These recordings provide valuable scientific information, allowing researchers to observe animal behaviour without disturbing the natural environment. Such observations once again demonstrate that the ecosystems of Cheremoskiy NNP are vibrant, diverse, and worthy of our continued protection.

LIST OF PAID SERVICES PROVIDED BY CHERMOSKIY NNP

Excursions along marked routes and ecological trails. Visiting (traveling) by tourists, sightseers on ecological and educational tourist routes and ecological trails in the territory of Perkalab and Selyatyn PAs (unaccompanied).

for adults - 100 UAH

for children under the age of 14 - 50 UAH

Excursions along marked routes and ecological trails. Visits (trips) by tourists, excursionists to ecological and educational tourist routes and ecological trails in the territory of Perkalab and Selyatyn PAs (with escort)

for a group of up to 12 people - 1 excursion - 1000 UAH

Walking (traveling) on a bicycle

day - 300 UAH

half a day (up to 5 hours) - 180 UAH

2 hours - 120 UAH

1 hours - 60 UAH

Use of the parking lot for vehicles*

Buses and trucks - 100 UAH

Cars - 70 UAH

Motor vehicles - 50 UAH

Use of the gazebo* - 250 UAH

Amateur photo/video shooting by citizens - 50 UAH

Video/film and television filming by citizens and organizations - 500 UAH

Accommodation in the premises of the environmental education visit center in the village of Ryzha for 1 day per person - 450 UAH

Accommodation (overnight stay in the premises of the EECC) for 1 day per person - 300 UAH

Transportation of tourists, vacationers (transfer or car excursion Putyla - the territory of the Cheremosky NNP - 1 departure - 3500 UAH

Provision of property for use per day/person:

- tourist mat - 50 UAH

- sleeping bag - 100 UAH

- tent - 300 UAH

***Categories of persons exempt from payment:**

- combatants
- liquidators of the Chernobyl accident;
- persons with disabilities of the I-II group;
- employees of nature reserve institutions of Ukraine in the performance of their official duties.

THE RED DEER—A SYMBOL OF THE CARPATHIAN WILDERNESS

The red deer (*Cervus elaphus*) is one of the most iconic inhabitants of the Carpathian forests of Cheremoskiy NNP. The Park is home to 25 individuals of this magnificent species.

During the winter months, the Park's State Protection Service regularly provides supplementary feeding for red deers. Staff prepare bundles of leafy branches, hay, and maintain salt licks to help the animals survive the harsh winter season.

Caring for wildlife is an essential part of conserving the unique natural heritage of the Ukrainian Carpathians.
